AdvanceNet Labs

AdvanceNet Labs built the **Education Empowerment Marketplace** to support a transformational change in education and training. Our long-term partnerships enable us to deliver corporate learning technologies and content previously too complex and expensive for the social sector.

Our goal is to prepare more organizations to successfully educate and train people, whether in-person or remote, to prepare them for the future.

Nonprofits can deliver training for their employees or clients. Providing student recruitment and management, world-class online content delivery, and integration to hiring systems of leading employers.

- We provide the systems, the staff training, and other support to bring your programs online.
- We help you retain your students and help them be successful whether in the classroom or participating remotely.
- We measure your impact for you and for your funders.

AdvanceNet Engagement- Examples

Community Council of Greater Dallas - Online workforce development training and collaboration: Multi-agency

Easter Seals - Online professional skills training for veterans

Education Opens Doors – Classroom training support and tracking

Wilkinson Center - Mobile app for student retention and support

Federal Reserve Bank of Dallas - Financial Literacy e-Learning

AdvanceNet Labs in Action

OpportunityOne

Opportunity One is a workforce ecosystem designed to enhance economic mobility in North Texas by removing barriers and increasing access to high-demand careers, job training and lifelong learning.

Opportunity One is a service offering of the Community Council of Greater Dallas, delivered in partnership with AdvanceNet Labs, Achieve Works, and a network of participating faith-based institutions, nonprofit organizations, and workforce training providers.

Powered by AdvanceNet Labs, the Opportunity One integrated platform provides:
• Benefits for individuals, employers and social service agencies
• 24/7 access to learning and development libraries
• Career pathway exploration and assessments
• Skills development and training referrals
• Integrated connections between employers, job seekers and agencies
• Continued support beyond job placement
• Innovative virtual job fair platform
• Robust data tracking and reporting
• Employer partnerships

Easter Seals

Tutoring, Training and Employment for Veterans

Collaboration Partners: Bank of America, Dallas Cowboys, Cornerstone Learning

AdvanceNet has designed and implemented the program technology and backend business processes to support several military family initiatives through our Empowerment Marketplace.

Easter Seals -Veteran Staffing Network leverages our Empowerment Marketplace to assess, train and connect veterans to quality employment opportunities. This program supports returning veterans and employers around the country.

Dallas Regional Chamber-Workforce Development

Collaboration Partners: Accenture, Texas Workforce Commission/Workforce Solutions, Dallas Regional Chamber

The Digital Career Explorer Tool – *My Amazing Life* - provides students with a "virtual counselling" experience for planning their academic and career pathway to success.

Students are assessed in a game-based format. Based on their interests, aptitudes and lifestyle goals, students are counselled on the careers and academic opportunities that are best suited for them. Based on actual, local workforce data, students are informed about quality careers and educational opportunities that exist in their local community.

Then students are connected to resources from multiple sectors in the community that can enable them to achieve their goals.
