

eCourse Development

AdvanceNet strives to bring the best learning experience for organizations looking to positively impact their clients and employees. Work alongside our expert eLearning developers to create the best eCourses for your users to engage and grow. Multiple package opportunities allow your organization to bring your training to the next level while keeping budget, content, and time in mind. The following offerings can be taken advantage of as one-time or monthly subscriptions.

- Work in conjunction with your team
- “Content Factory” for a dynamic and efficient process for designing your content
- Any training content format can be converted to eLearning.
- All eLearning is published as SCORM for the best user experience

Packages

Level 1: Basic eCourse Development

Convert existing learning documents into a straightforward SCORM package that can be tracked and managed through the LMS.

Level 2: Simple eCourse Development

Convert existing learning documents into simple, interactive eCourses. This package includes adding quiz questions, updating designs, and adding simple interactions.

Level 3: Complex eCourse Development

This package will transform your content into robust, engaging, and interactive eCourses. Video, webinar, PPT, PDF, Word, or webpage can be converted to an interactive, branded eCourse.

The Content Factory

An ANL eCourse Development Method
